

Release Notes

PayrollPlus version 1.10.0.21

Release Date

June 9th, 2017

Technical Specifications

Software Version: 1.10.0.21

Database Version: 4.0

Requirements

Minimum Requirements

Hardware

CPU: Inter Core i3 or equivalent

Memory: 2 GB

Storage: 300 MB

Display Resolution: 1366 x 768

Network Interface: Ethernet 10 Mbit or
Wi-Fi adapter

Software

Operating System: Window 7 SP1 or later

Framework: .NET 4.5 or later

Recommender Requirements

Hardware

CPU: Inter Core i3 or equivalent

Memory: 4 GB

Storage: 1 GB

Display Resolution: 1920 x 1080

Network Interface: Ethernet 1000 Mbit or
Wi-Fi adapter

Software

Operating System: Window 7 SP1 or later

Framework: .NET 4.5 or later

Database

PostgreSQL version 9.4.

Other Requirements

No other requirements. All previous updates are included in this update.

Release Features

PayrollPlus new features increase the capabilities of the software allowing the user to be more productive, to have more control on the payroll process and to gain more decisional tools and outputs for the administration of the company.

Employee Vacations Request Report

Following the needs and requests of our clients, a new report has been created. This report allows managers to understand and decide whether to approve or not a vacation requested by an employee. Also, it is a great report for the registry of the HR department.

RSS Support

RSS Feeds are popular and really useful when used the right way. Using RSS Feeds the user is now able to get announcements (from our website) inside the software.

Enhancements

PayrollPlus features has been enhanced with better performance, enriched new reports and functionalities.

Faster Software Loading

Even though PayrollPlus is a light and fast application, now start-up time is even less.

Custom Reports Requests

Reporting is maybe the most important output of any software. PayrollPlus offers a vast amount of report exports, however there is always request for something new and/or different. Thus, we now accept requests for implementing custom reports for the special needs of our clients.

TD61 Report

This report is redesign to meet the newly created report by Tax Department.

Adding Employees in an Active Payroll

Having in mind that in real life things happen in non-perfect timing, the new functionality of adding employees in an active payroll has been created. This functionality allows creating a payroll and adding missing employees in a later stage.

Security

As per our clients requirements new security levels have been created.

Fixes

Due the new features and functionalities required to be implemented in PayrollPlus, from time to time we face some issues that need to be fixed. This is an unpleasant case for us and our clients and we always do our best to solve all issues that might raise as soon as possible.

Calculations on 14th Salary

Calculating 14th salary under certain conditions was resulting in null (zero) calculation. This is fixed.

Payslip with vacations

Payslip report enhanced during the previous release to include vacation balances. However, it was found that vacations listed in a later date were included in the report. This is now fixed.

Automatic Annual Employees' Vacations Allocation

Allocating employees' vacations is done automatically. However, when allocation is done annually and many vacation groups exists for past and previous periods, allocation has been done for all groups at the same time for the first time. This is fixed.

Known Issues and Problems

We always want to solve issues raised in PayrollPlus before releasing a PayrollPlus Update. However, in order to give solutions as fast as possible, we sometime release updates before fixing all known issues. Yet, we still want to let you know for those issues and minimize the way the issue affects you.

No known issues

Upcoming Features

There is always something new that we are working on, and we would like to let you know about what to expect in the near future.

Multicurrency Support

Upcoming features will include multicurrency support to unlimited number of currencies. This will allow companies paying in currencies other than Euro to use the software in a more flexible way.

Interface with more popular accounting software

We are implementing interfaces with accounting software to make your life easier. There is many accounting software available in the market and as new customers request implementation of interface with the accounting software they use, we develop accounting interfaces from time to time.

Reporting

Reports that are available in the software are enriched and prepared based to the needs of the clients. New reports are developed and getting available on every software update.

Travelling

Travelling tracking of employees of the organisation.
