

Release Notes

PayrollPlus version 1.9.0.21

Release Date

April 3rd, 2017

Technical Specifications

Software Version: 1.9.0.21

Database Version: 4.0

Requirements

Minimum Requirements

Hardware

CPU: Inter Core i3 or equivalent

Memory: 2 GB

Storage: 300 MB

Display Resolution: 1366 x 768

Network Interface: Ethernet 10 Mbit or
WiFi adapter

Software

Operating System: Window 7 SP1 or later

Framework: .NET 4.5 or later

Recommender Requirements

Hardware

CPU: Inter Core i3 or equivalent

Memory: 4 GB

Storage: 1 GB

Display Resolution: 1920 x 1080

Network Interface: Ethernet 1000 Mbit or
WiFi adapter

Software

Operating System: Window 7 SP1 or later

Framework: .NET 4.5 or later

Database

PostgreSQL version 9.4.

Other Requirements

No other requirements. All previous updates are not included in this update.

Release Features

PayrollPlus new features increase the capabilities of the software allowing the user to be more productive, to have more control on the payroll process and to gain more decisional tools and outputs for the administration of the company.

Reverse Calculation (Net to Gross)

Calculating Net Pay from Gross Salary deducting funds and taxes is the obvious/traditional way. PayrollPlus can now perform reverse calculation and find Gross Salary based on desired Net Pay.

New Report Exports

Following the needs and requests of our clients, new report exports have been created. Specifying required period, the software creates Excel exports with all payroll details of the period, showing details of each payroll and employee separately, or in total.

More specifically, the new report exports are the following:

- *Period Payroll Analysis Report*
- *Period Payroll Analysis Summary Report*
- *Period Employee Payrolls Analysis Report*
- *Period Employee Payrolls Analysis Summary Report*

Social Insurances Export

Social Insurances monthly report is available from the first time in the software. In addition, now the software creates export file that can be uploaded via the Social Insurances website for fast payment of this monthly company liability.

Enhancements

PayrollPlus features has been enhanced with better performance, enriched new reports and functionalities.

User Interface – Active Payroll

Selecting an employee in an active payroll, highlights the selection to make it visible even on monitors with low contrast.

User Interface - General

User experience has been enhanced a lot with new messages/tips/warnings where the experience of the existing clients suggested that.

Menu Triggering

To make things easier, when creating or opening a payroll, the software will show relative menu automatically.

Reports - Payslip

Providing payslips to the employees is a must. The information on the payslip is important to have a good communication with the staff. Now PayrollPlus includes (on activation) employees' vacations.

Interface with Popular Accounting Software - Journal Entry

Interface with popular accounting software is a must, and it is enhanced even more now, giving the ability to spit Salaries Payable (Liability) account entries into multiple, one for each employee payment records.

Fixes

Due the new features and functionalities required to be implemented in PayrollPlus, from time to time we face some issues that need to be fixed. This is an unpleasant case for us and our clients and we always do our best to solve all issues that might raise as soon as possible.

Creating Weekly Payrolls

Creating weekly payroll was easy, but when cancelling the creation was raising an error. This issue has been fixed.

Creating weekly payroll was not including all new employees. This issue has been fixed.

Known Issues and Problems

We always want to solve issues raised in PayrollPlus before releasing a PayrollPlus Update. However, in order to give solutions as fast as possible, we sometime release updates before fixing all known issues. Yet, we still want to let you know for those issues and minimize the way the issue affects you.

No known issues

Upcoming Features

There is always something new that we are working on, and we would to let you know about what to expect in the near future.

RSS Support

RSS Feeds are popular and really useful when used the right way. Using RSS Feeds the user will be able to get announcements (from our website) inside the software.

Multicurrency Support

Upcoming features will include multicurrency support to unlimited number of currencies. This will allow companies paying in currencies other than Euro to use the software in a more flexible way.

Interface with popular accounting software

We are implementing interfaces with accounting software to make your life easier. There is many accounting software available in the market and as new customers request implementation of interface with the accounting software they use, we develop accounting interfaces from time to time.

Reporting

Reports that are available in the software are enriched and prepared based to the needs of the clients. New reports are developed and getting available on every software update.

Travelling

Travelling tracking of employees of the organisation.
